hospital patients has at least one **healthcare-associated infection**.[†] Infection from cross-contamination is one of the 2 forms of HAI.[†]

[†]<https://www.cdc.gov/hai/surveillance/index.html>
[†]http://www.who.int/water_sanitation_health/medicalwaste/148to158.pdf

Using the SCOTT® Clinical Roll as a disposable liner for high turn-over beds or examination couches may help **reduce** the chances of cross-contamination and **Healthcare-Associated Infection (HAI)**.*

*together with a proper implementation of a HAI prevention program

SCOTT® Clinical Roll:

Strong and absorbent paper-towel like quality for improved performance

Embossed paper for an improved feel against skin

1 ply perforated sheets for easier dispensing
